

## Recommendation for Uliana Andriireshyna

Uliana got position of VAS(Value Added Service) Solutions System Analyst in Company «Astelit» in January, 2011 with such responsibilities:

- Analyzing, creating and applying business logic for development and implementation of new Tariffs, Campaigns, VAS platforms and IT projects addressing the needs and requirements of business groups and departments;
- Establishing a communication bridge between technical departments and business streams;
- Business Analyses of telecom products;
- Project management in a middle size projects, also taking part in projects as member;
- Workshop organization

Also she got trainings in such case: VAS solution technology, Billing System, «WCDMA (3G)», « Visual Thinking & Image Design» training which Uliana passed successfully. She showed good knowledge in Telecom products, analytical thinking, excellent communication skills in both oral and writing(English also), open for communication with internal/external customers, ability for analytical conclusions, result oriented thinking. Also she got experience in IT business analyze and project management, test experience.

Manager of VAS Solution Unit
